DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 4, 5, 7, 16, 17 and 19-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is insufficient support for the limitation of "cereal sugar."

Claim Rejections - 35 USC § 103

Claims 4, 5, 7, 16, 17 and 19-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seebeck, U.S. Patent 4,329,433, in view of Shimamura et al., U.S. Patent 6,265,000, and Applicant's admissions, as applied in the previous Office Action, in further view of Hirao et al., U.S. Patent 4,001,435, and Snelling, U.S. Patent 1,461,808.

The Examiner has interpreted "cereal sugar" to be maltose in view of the Applicant's remarks. Seebeck merely discloses fruit juice and it is assumed that any fruit juice with the required amount of sugar for fermentation would suffice. Hirao discloses that fruit juices with maltose are known (see Example 1). Also, Snelling discloses the addition of maltose, dextrose, and other suitable carbohydrates to fruit juice to aid in a fermentation process (page 2, lines 65-75). In view of these teachings, it would have been obvious to use a fruit juice containing maltose, dextrose, and/or other suitable carbohydrates in the invention of Seebeck, since such carbohydrates were known to be acceptable for use in fermentation processes.

Response to Arguments

Applicant's arguments with respect to claims 4, 5, 7, 16, 17, 19 and 20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1761

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
